

Model – View – Controller

A Design Pattern

Author: Torey Hickman Phase 1: Day 10

Model – View – Controller

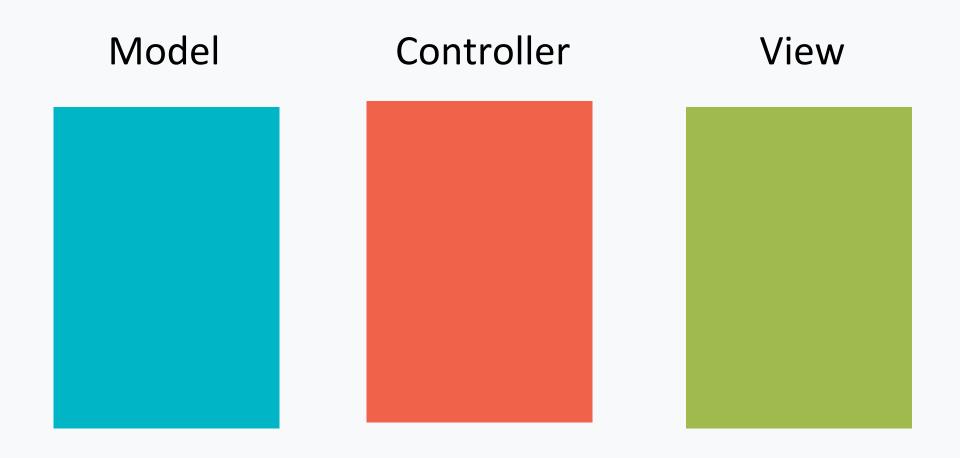

- What is it?
- What does it look like?

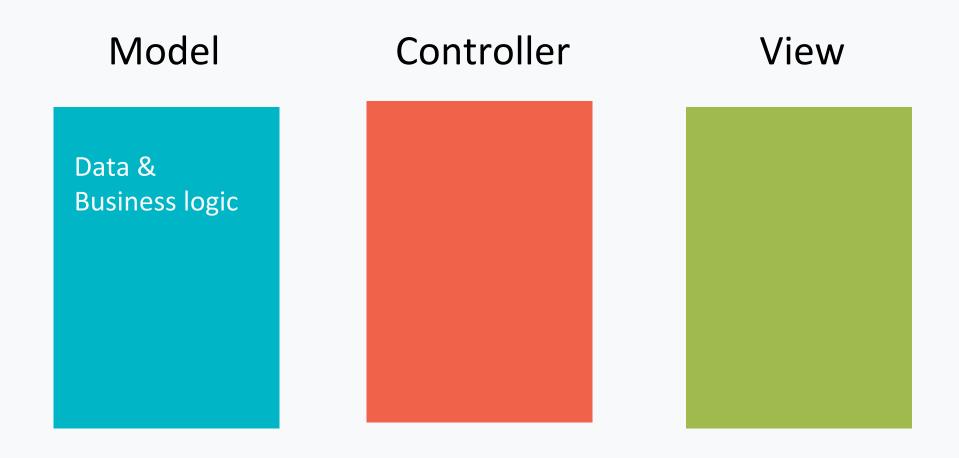

Design Patterns

Reusable description for how to solve recurring problems

Recurring Problem for M-V-C

- Data and business logic
- User interface
- Communication between them

Model Controller View Data & **Business logic** classes modules databases

Model Controller View Data & User interface **Business logic** classes modules
